## What are people saying?

- I just wanted to let you know that I downloaded the Gus Overboard evaluation copy and I am so happy at the ease of use. I do have \*\*\* and between the two, Overboard is far easier to work with. Your symbols are not childish, I can arrange them and use my own collection without any hassle, I can add my own text and delete and arrange without the hassle. I can change the appearance of the file in seconds, which does give me more time to be with my family. THANK YOU
- I will be back in May to purchase this. I am so happy this came out, my hat's off to all who took part in the development of this program, for they did keep in mind the ease of usage for the consumer. I am saving up for the complete software in which I can put that on my son's laptop.
- I've been struggling for years to get my teenage and adult clients to accept the \*\*\* symbols. Thank you for creating an alternative they are HAPPY with.
- "I've only been using Overboard for 3 days and I'm hooked. I LOVE it. It is so much easier to use. Thank you!!
- "Very impressive. We'll be ordering a 5 pack next week. Have a good weekend."
- "I found the video demonstrations on your web site to be very convincing. It was the reason I purchased Overboard even though I purchased BM just a few weeks ago."
- "I checked out your website and prefer your symbols to \*\*\* I'm an AT Consultant and have to purchase everything on my own so cost is a major consideration for me and for products that I recommend. It is great to know that there is now a choice - a little competition is good."
- "Congratulations for coming up with a very good product."
- "Today, I finally had a chance to review your Overboard software. It is GREAT!"
- "Overboard is an excellent alternative to \*\*\*. It is wonderful tool for parents struggling with the fact that they can't afford \*\*\*"
- "The best new piece of software for special ed in several years, at nearly half the price of its major competitor. Congratulations."
